

Portable and robust Pressure Calibrator for calibrating your test objects in the process...

Thanks to the robust, compact and lightweight design, the MG20 Pressure Calibrator is perfectly suitable for on site applications.

The MG20 Pressure Calibrator is suited with our HM35 series digital gauges.

- + Relative pressure
- + Differential pressure
- + Absolute pressure

The built in pressure generator is capable of producing overpressure up to 10 bar and underpressure up to -800 mbar.

Via built in volume, the pressure can be fine-adjusted.

- + Ex versions
- + Media compatible versions available

- + Pressure change rate
- + MIN/MAX values
- + Averaging

Our MG20 series Pressure Calibrators come including an internationally acknowledged SCS calibration certificate.
