

Bourdon Tube Pressure Gauges

We do offer a wide range of bourdon tube pressure gauges.

The portfolio ranges from process gauges manufactured in 316L to test gauges with accuracy classes up to 0.15% FSD! There are various options to configure your pressure gauge suitable for your application.

Even special solutions made from hastelloy or suited with diaphragm seals are available.

Please don't hesitate to send us your enquiry or your functional specification document, free of obligations.
