

Handheld pressure calibrator with two pressure sensors, coverage of two independent pressure ranges

Handy, high functionality, generate and measure voltage and current...

...the pressure calibrator HM38 provides the user with two individual pressure measuring ranges for over- and under-pressure, differential or absolute pressure.

- 2 pressure sensors for coverage of two individual pressure ranges
- Current / Voltage generating and measuring

The illuminated display and the zoom function ensure good readability of the measured values.

- Datalogger
- RS232 connection
- Min / Max values
- Hold function
- 11 switchable measurement units
- Media compatible versions available

Our HM38 pressure calibrators come **with an internationally acknowledged** SCS calibration certificate on delivery
