

Panel Manometer HM19

Digital panel gauge for fixed installation purposes...

The HM19 is the successor of the analog Thommen gauges

Capable of measuring absolute-, relative-, and differential- pressure

The differential pressure version is also capable of measuring vacuum (if the "S-" connector is used)

- + Media compatible versions available
- + Accuracy classes from 0.2% up to 0.05% F.S. selectable
- + 12 switchable measuring units
- + Easy operation
- + Individually configurable
- + Configuration is loggable
- + Resolution and damping selectable
- + Zoom function for good readability in difficult environments
- + MIN/MAX value
- + Leak rate and tendency
- + Datalogger
- + RS232 interface

The HM19 series **do include an internationally acknowledged SCS** calibration certificate on delivery
